PSEB Class 10 Science – Chapter 2

Acids, Bases and Salts | Practice Worksheet

Name: _____ **Roll No.:** _____ **Date:** _____

Instructions: Attempt all questions. Answer key is provided at the end for self-checking.

A. Multiple Choice Questions (MCQs)

1. Which of the following turns blue litmus red?
A. Base
B. Acid
C. Salt
D. Water

2. The acid present in lemon juice is mainly:
A. Acetic acid
B. Citric acid
C. Lactic acid
D. Formic acid

3. A solution with pH 2 is:
A. Strongly acidic
B. Neutral
C. Weakly basic
D. Strongly basic

4. Which gas is released when an acid reacts with a metal?
A. Oxygen
B. Nitrogen
C. Hydrogen
D. Carbon dioxide

5. The chemical formula of baking soda is:
A. Na2CO3
B. NaHCO3
C. CaCO3
D. NaCl

6. Which of these is commonly used to neutralise excess acid in the stomach?
A. Sodium chloride
B. Magnesium hydroxide
C. Hydrochloric acid
D. Vinegar

7. Tooth enamel starts to be damaged when mouth pH falls below about:
A. 7.0
B. 6.5
C. 5.5
D. 2.0

8. Which salt is used in making plaster of Paris?
A. Gypsum
B. Washing soda
C. Baking soda
D. Common salt

9. The chemical formula of bleaching powder is commonly written as:
A. CaOCl2
B. NaCl
C. CaCO3
D. Ca(OH)2

10. Which indicator is colourless in acidic solution and pink in basic solution?
A. Litmus
B. Turmeric
C. Phenolphthalein
D. Methyl orange

B. Fill in the Blanks

1. Acids produce _____ ions in aqueous solution.
2. Bases produce _____ ions in aqueous solution.
3. The pH of a neutral solution at 25°C is _____.
4. The reaction between an acid and a base is called _____.
5. The chemical name of baking soda is _____.
6. The chemical formula of washing soda is _____.
7. The gas that turns limewater milky is _____.
8. The acid present in the stomach is _____.
9. Plaster of Paris has the formula _____.
10. Sodium chloride is commonly known as _____.

C. True or False

1. All acids are safe to taste.
2. Acids turn blue litmus red.
3. A pH value of 7 is neutral at 25°C.
4. Bases turn red litmus blue.
5. Distilled water is acidic with pH 2.
6. Baking soda is sodium hydrogen carbonate.
7. Acid + base can produce salt and water.
8. Bleaching powder is used to disinfect drinking water.
9. Strong acids always have a pH greater than 7.
10. Washing soda contains water of crystallisation.

Answer Key

Check your answers after completing the worksheet.

A. MCQs

1. B 2. B 3. A 4. C 5. B 6. B 7. C 8. A 9. A 10. C

B. Fill in the Blanks

1. H■ (or hydronium, H■O■)
2. OH■
3. 7
4. Neutralisation
5. Sodium hydrogen carbonate (sodium bicarbonate)
6. Na■CO■·10H■O
7. Carbon dioxide
8. Hydrochloric acid
9. CaSO■·½H■O
10. Common salt

C. True or False

1. False
2. True
3. True
4. True
5. False
6. True
7. True
8. True
9. False
10. True

Note: This is an original practice worksheet based on the commonly taught Class 10 topic “Acids, Bases and Salts.” Please compare the chapter title and syllabus with your current PSEB textbook.
